

Testing text conversion

I wonder if I can write basic markdown. Will

underscores convert?

What about *asterisks*?

Or **double asterisks**?

What about lists?

1. Item One

2. Item two

Or bulleted lists

- One

- Two

Or nested lists?

* One

- AAA

- BBB

* Two

- CCC

- DDD

Sub headings
Do they work?

Level three headings
And with nested, ordered then
bulleted lists?

1. Hello

- Sub item

- Another subitem

2. World

Or this?

* Top bullet

1. sub 1

2. sub 2

* Bottom bullet

Smile
